Pairbook demo sticker

For App Review. This code is invented and can't pair any accessory.

111-11-111

1. Open Pairbook and tap + (Add Code).
2. Tap Scan with Camera and point at the QR code above.

(Typing 111-11-111 is rejected on purpose: HomeKit never issues that code. Scan the QR.)

3. Pairbook marks it DEMO. Confirm it and save it as a spare.

Demo codes are marked in the app and left out of exports.
